April 2004

Dear UNAC/UHCP Professional Colleagues:

We appreciate your support and involvement as we have addressed the challenges we face because of the "raiding activities" of the California Nurses Association during the past three months.

We realize that this campaign by C.N.A. has caused many questions and has created a divisive atmosphere in some of your work areas which is very disheartening – disheartening because the C.N.A. campaign, letters, flyers, meetings, are rife with misleading statements. Some of the information from C.N.A. is true, some of the information is partially true, and some of the information is lies. This is a true "smoke and mirrors" political campaign.

We have continued to give you factual information regarding UNAC.

We have established a special website solely to address your questions and keep you involved during the campaign. That website is: www.nursesunite.org.

We would also like to keep you individually up to date by issuing email newsletters and information.

Please fill-in and return the enclosed self-addressed postcard with your updated address, phone and email address, if you have one available.

Again, we appreciate your patience and support during this difficult period for our organization.

Sincerely,

Kathy J. Sackman, RN
President
