Something interesting about you that our members don't know: Although I personally have only been involved in the industry for 5 years, I have learned and continue to learn a great deal in the onsite industry. I have been able to bring our local septic contractors together for meetings to discuss concerns in the industry. I have become the middle man for contractors between contractor & local DOH. I have been able to get contractors to work together rather than against each other. It has been very challenging but I feel we have developed some good relationships and seem to be becoming more professional.

If you could be a cartoon character, who would you be? Wonder Woman
