

Spot Free Rinse Systems With Reverse Osmosis

RE-CYKE® SFRS Series

- ◆ Eliminates Water Spots and Streaks
- ◆ Prevent Acid Rain Damage
- ◆ Under 20 Cents Per Car
- ◆ Reduces Labor Costs

Why Do I Need a Re-Cyke® Spot Free System?

One of the biggest problems for your vehicle washing is water spotting, which occurs when water evaporates and leaves minerals on the surface. These charged mineral particles bond to the car's painted surface. By removing the minerals in water, there is nothing left to bond to the vehicle's paint.

What is Reverse Osmosis?

Reverse Osmosis (RO) is a procedure to remove dissolved solids from your rinse water. Water is forced through a filtering membrane which traps the minerals. These rejected particles are flushed to the drain, and the pure water passes to the storage tank.

STANDARD FEATURES:

- ◆ T.F.C. R.O. Membrane
(99% Average Salt Rejection)
- ◆ Expandability to Upgrade
- ◆ Booster Pump - Stainless Steel
- ◆ 5-Micron Sediment Prefilter
- ◆ Stainless Steel Hoses
- ◆ Epoxy-Coated Frame
- ◆ Automatic Feed Water Shut-Off Valve
- ◆ Concentrate Pressure Gauge
- ◆ Compact Re-pressurization Stage
- ◆ Low Pressure Shut-Off
- ◆ TDS Monitor

OPTIONAL FEATURES:

- ◆ Product Water Flow Meter
- ◆ Concentrate Recycle Valve
- ◆ Recycle Flow Meter
- ◆ 50 Hz Motors
- ◆ Carbon Filter Pretreatment
- ◆ Auto Fast Flush
- ◆ Water Softener Pretreatment
- ◆ Water Stabilizer
Pretreatment
- ◆ Storage Tanks
- ◆ System Enclosures
